Education

University of Wisconsin Stout, Menomonie WI

Currently in my third year at UW-Stout, I am pursuing an undergraduate degree in Applied Math and Computer Science with an emphasis in Software Development. I have completed 7 courses in Computer Science through the UW System.

Neillsville High School, Neillsville WI

During high school I was a part of various clubs. Student Council, Skills USA, and being the Senior Class President, all have helped me gain great leadership experience.

Experience

University of Wisconsin-Stout, Supplementary Instructor

Sept 2020 – Present

I was a Supplementary Instructor (SI) at UW-Stout, which is a program set up by the school. I essentially was a TA for a class and responsible for grading homework, following along in class, answer questions from students, and being there when the instructor is not available. Along with being assigned to a particular class, I helped any number of CS students in the tutor lab.

Larson Construction, Chippewa Falls WI

July 2018 – Sept 2018, May 2019 – Present

Working construction over the summer, I gained the discipline needed to be on time, consistent, and responsible.

University of Wisconsin-Stout Dining Employee

Sept 2018 - January 2019

General kitchen staff

Gordy's Market, Neillsville WI (Closed)

Oct 2015 – June 2018

Manager-On-Duty

Skillset

Communication

I have complete confidence in public speaking. I am great with people and can easily take charge of a situation. Many times, I would have to understand and compromise with various customers. I can handle any situation thrown at me with complete insurance I can control it.

Leadership & Teamwork

I have always been a fair and just person, and that is a definite need when you are in a team. Working with others is a necessary skill, and I love working with people. Assigning roles, working on issues, all comes natural to me in a group.

Programming Languages

I have been experienced in multiple different languages in my career, starting out at a young age with Lua, I quickly learned the essentials of Visual Basic, Java Script, Java, and especially C++. With this experience I can learn any language required to do a job, the logic and principles stay the same and that is a key factor for a great programmer.

Computer Hardware

I am knowledgeable about all computer hardware. I have picked parts for many people, built more than three computers for some. I have built or rebuilt my own computer many times and have used extra parts to create new ones. I have knowledge of trouble shooting, error codes, and dealing with dated hardware. I keep up with the latest hardware news and I feel as though I'm a computer hardware enthusiast. I routinely overclock computers and have knowledge of almost all terminology. I have taken a computer architecture class which solidifies the connection between computer hardware and software.
